RENTAL SOFTARE THAT MANAGES SHORT
AND LONG TERM RENTALS

CLOUD
No installation
needed

INTEGRATED
management software,
external data flow

WEB RESPONSIVE
Available for PC,
tablet and smartphone

RentinCloud is a cloud car rental software that doesn't need any sort of installation or local maintenance and guarantees a quick and efficient rental. RentinCloud works anywhere and on any device (PC, tablet and smartphone) thanks to its responsive design.

INTEGRATED BUSINESS INTELLIGENCE

RenintCloud natively integrates a suite of Business Intelligence, in order to track and analyse data with maximum efficiency

RENT PLANNER

You can check the state of your fleet and manage booking in real-time and on a single panel

GDPR COMPLIANCE

RentinCloud allows you to adhere to the new European law requirements, avoiding problems and fines

ONLINE BOOKING

RentinCloud gives you the chance to integrate online booking directly on your own website. Customers can search, book and directly pay their rental with a credit card. In real time and with no overbooking

GPS INTEGRATION

RentinCloud integrates satellite localisation monitoring with fleet management
